iTHX

RAIL-35-2 DIN Rail, 2 m (19.5"), sold separately, \$15.

PROBE INCLUDED!

iTHX-2 iServer MicroServer™ shown with industrial temperature/humidity probe (included), \$295.

iTHX-W, \$295, shown smaller than actual size.

iServer

View Temperature and Humidity with a Web Browser

The OMEGA® iTHX transmitter lets you monitor and record temperature, relative humidity, and dew point over an Ethernet network or the Internet with no special software except a Web browser.

The OMEGA iTHX serves active Web pages to display real-time readings, charts of temperature and humidity, or log data in standard data formats for use in a spreadsheet or data acquisition program such as Excel or Visual Basic.

The virtual chart viewed on the Web page is a JAVA™ Applet that records a chart over the LAN or Internet in real time. With the OMEGA iTHX, there is no need to invest time and money learning a proprietary software program to log or chart the data.

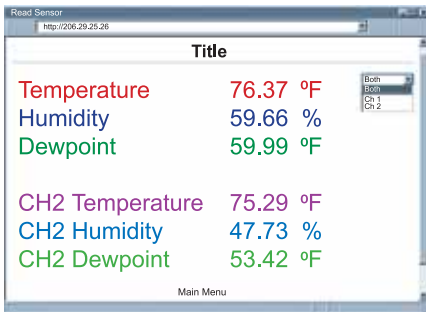

Adjustable Charts

Chart scales are fully adjustable on the fly. For example, the chart can display 1 minute, 1 hour, 1 day, 1 week, 1 month, or 1 year. Temperature and humidity can be charted across the full span [0 to 70°C (32 to 15°F), and 0 to 100% RH] or within any narrow range, such as 20 to 30°C (68 to 86°F). When a second sensor is added, users can select a chart that records channel-1, channel-2, or the difference of the 2 channels.

Display and Chart Two Channels (Models iTHX-W and iTHX-2 only)

The iTHX transmitters come complete with a temperature and humidity probe for measurement of a single location. With the addition of a second probe, the iTHX transmitter can measure and display temperature, humidity, and dew point in a second location up to 20' away.

The transmitter can display and chart absolute measurements in both locations, or a differential measurement between the two locations. The second probe requires no change to the basic iTHX transmitter hardware, firmware, or software.

Web page displaying data received from the sensor.

A second probe can be added at the time of purchase or in the future. OMEGA offers a choice of industrial probes in 2 and 5" lengths, and a wand style for ambient indoor applications. A simple DB-9 "Y" connector is available for adding a second probe to model iTHX-W. No connector is required to add a second probe to the DIN rail mounted iTHX-2.

Dual channel measurement is available on model iTHX-W and iTHX-2 only; it is not available on model iTHX-M.

Award-Winning Technology

The OMEGA iTHX is simple to install and use, and features OMEGA's award-winning iServer technology that requires no special software except a Web browser.

The iTHX connects to an Ethernet network with a standard RJ45 connector and sends data in standard TCP/IP packets. It is easily configured with a simple menu using a Web browser and can be password protected.

From within an Ethernet LAN or over the Internet, the user simply types the IP address or an easy-to-remember name such as "Cleanroom 5" or "Midwest Server Room" in any Web browser, and the iTHX serves a Web page with the current readings.

Typical Applications

The OMEGA iTHX is great for monitoring temperature and humidity in applications such as: clean rooms, computer rooms, HVAC systems, pharmaceutical and food processing and storage, hospitals, laboratories, semiconductor labs, electronic assembly, warehousing, museums, manufacturing, greenhouses and, farm animal shelters.

NEW iTHX-M with Flash Memory and LCD Display

The OMEGA model iTHX-M with LCD display adds several valuable features in addition to the backlit local display of temperature and humidity.

The "memory" model comes complete with a removable 2 MB flash memory card that can store 1 full year of readings taken at 1 minute intervals (or 2 months of readings taken at 10 second intervals).

Up to four4 years of temperature and humidity readings can be stored on the 8 MB card.

With data being recorded in the built-in non-volatile flash memory, a failure on the Ethernet network will not interrupt the data record.

Alarm Relays

The OMEGA iTHX-M features two 1.5 Amp relays. With the easy Web-based setup page, the 2 relays can be programmed for any combination of temperature and humidity, and high or low set points. The relays can also be programmed to remain latched and require a manual reset if a limit is exceeded.

Email Alarms

In addition to the mechanical alarm relays, all OMEGA iTHX models that are on a LAN connected to the Internet can trigger an alarm that can be sent by email to a user or a distribution list anywhere in the world, including an Internet-enabled pager or cell phone.

Battery Backup

The iTHX-M comes with an AC adaptor. A standard 9 V alkaline battery (also included) allows the device to log data for up to 10 days without external AC power. In locations without power or network accessibility, the iTHX-M continues logging data to its flash memory. The stored data can later be downloaded over the Ethernet. OMEGA iServer products are designed and manufactured in the USA.

NIST-Traceable Calibration Certificate available.
In compliance with ISO9001:2000, ISO10012-1.1992(E), ANS/NCSL Z540-1.1994 and MIL-STD-45662A.

Sensor Specifications

Relative Humidity (RH)

Accuracy/Range:

10 to 90%: $\pm 2\%$

0 to 10% and 90 to 100%: $\pm 3\%$

Non-Linearity: $\pm 3\%$

Hysteresis: $\pm 1\%$ RH

Response Time: 4 seconds

Power Input:

iTHX-W and iTHX-M: 9 to 12 Vdc
iTHX-2: 10 to 32 Vdc

Safety qualified AC power adaptor

Nominal Output:

iTHX-W, iTHX-M: 9 Vdc @ 0.5 A (included)

iTHX-2: Switching power supply (sold separately)

Consumption: 2.5 W max

Battery (iTHX-M): 9 Vdc, alkaline (included)

Environmental

Operating Temperature: 0 to 70°C (32 to 158°F)

Storage Temperature: -40 to 125°C (-40 to 257°F)

Packaging

Material:

iTHX-W, iTHX-M: Metal case with flange mount

iTHX-2: Polycarbonate case with DIN rail mount

Dimensions: See page Hu-10

iDRN-PS-1000 \$150

- 24 Vdc Supply
- Switching Power Supply Powers Up to 7 Units

Mounts to 35 mm DIN rails.
